THIRD INTERNATIONAL CONFERENCE
SUSTAINABLE POSTHARVEST AND
FOOD TECHNOLOGIES
INOPTEP 2013
and
XXV NATIONAL CONFERENCE
PROCESSING AND ENERGY
IN AGRICULTURE
PTEP 2013
April 21st – 26th, 2013, VRNJAČKA BANJA, SERBIA

PROCEEDINGS ZBORNIK

TREĆA MEĐUNARODNA KONFERENCIJA
ODRŽIVE POSLEUBIRAJUĆE I
PREHRAMBENE TEHNOLOGIJE
INOPTEP 2013
i
XXV NACIONALNA KONFERENCIJA
PROCESNA TEHNIKA I ENERGETIKA
U POLJOPRIVREDI
PTEP 2013
21 – 26. april, 2013, VRNJAČKA BANJA, SRBIJA

SCIENTIFIC COMMITTEE / NAUČNI ODBOR

INTERNATIONAL MEMBERS:

- Prof. Dr. Costas Akritidis**, Emeritus Professor, Aristotle University, Thessaloniki, Greece,
Prof. Dr. Silva Cristina, Portuguese Catholic University, Porto, Portugal,
President of ISEKI-Food Association
Prof. Dr. Harris Lazarides, Aristotle University, Thessaloniki, Greece, copresident
Dr. Gerhard Schleining, BOKU University, Vienna, Austria,
Secretary General of ISEKI-Food Association
Prof. Dr. Tajana Krička, University of Zagreb, Croatia,
Prof. Dr. Zuzana Hlavačová, University of Agriculture in Nitra, Slovakia,
Prof. Dr. Zsuzsanna Füstös, Central Agricultural Office, Budapest, Hungary,
Prof. Dr. Marko Dalla Rosa, University of Bologna, Italy,
Prof. Dr. Richard Gladon, Iowa State University, USA,
Prof. Dr. Elisabeth Demoulin, Agroparistech, Paris, France,
Prof. Dr. Costas Biliaderis, Aristotle University, Thessaloniki, Greece,
Prof. Dr. Vlasta Vozárová, University of Agriculture in Nitra, Slovakia,
Prof. Dr. Vangelče Mitrevski, University "St Kliment Ohridski" Bitola, FYR Macedonia,
Dr. Stavros Vougioukas, Aristotle University, Thessaloniki, Greece,
Prof. Dr. Selim Škaljić, Faculty of agriculture, Sarajevo, Bosnia and Herzegovina.

NATIONAL MEMBERS:

- Prof. Dr. Mirko Babić**, Faculty of Agriculture, Novi Sad, General Secretary of National Society of Processing and Energy in Agriculture, copresident
Prof. Dr. Ljiljana Babić, Faculty of Agriculture, Novi Sad, Vice-president of National Society of Processing and Energy in Agriculture, copresident
Dr. Jovanka Lević, Institute of food technology, Novi Sad,
Prof. Dr. Milica Radosavljević, Maize Research Institute "Zemun Polje", Belgrade, Vice-president of National Society of Processing and Energy in Agriculture,
Prof. Dr. Dragan Škorić, Serbian Academy of Science and Arts, Belgrade
Prof. Dr. Mirjana Đurić, Faculty of Technology, Novi Sad,
Prof. Dr. Andelko Bajkin, Faculty of Agriculture, Novi Sad,
Prof. Dr. Dušan Milić, Faculty of Agriculture, Novi Sad,
Prof. Dr. Filip Kulić, Faculty of Technical Science, Novi Sad,
Prof. Dr. Dragan Marković, Mechanical Faculty, Belgrade,
Prof. Dr. Miloš Tešić, Faculty of Technical Science, Novi Sad,
Dr. Milka Vujaković, „Poljoprivredna stanica“ Ltd, Novi Sad, Serbia,
Dr. Mirjana Milošević, Institute of field and vegetable crops, Novi Sad,
Dr. Vladeta Pavasović, Faculty of Agriculture, Zemun,
Dr. Svetlana Balešević-Tubić, Institute of field and vegetable crops, Novi Sad,
Dr. Branislav Karadžić, Faculty of Agriculture, Novi Sad.
Dr. Ivan Pavkov, Faculty of Agriculture, Novi Sad.

Publisher / Izdavač

National Society of Processing and Energy in Agriculture, Novi Sad, Serbia

CONFERENCE ORGANIZERS:

- UNIVERSITY OF NOVI SAD, FACULTY OF AGRICULTURE, DEPARTMENT OF AGRICULTURAL ENGINEERING, NOVI SAD
- NATIONAL SOCIETY OF PROCESSING AND ENERGY IN AGRICULTURE

ORGANIZATORI SKUPA:

- UNIVERZITET U NOVOM SADU,
- POLJOPRIVREDNI FAKULTET
- DEPARTMAN ZA POLJOPRIVREDNU TEHNIKU, NOVI SAD
- NACIONALNO DRUŠTVO ZA PROCESNU TEHNIKU I ENERGETIKU U POLJOPRIVREDI, NOVI SAD,

CONFERENCE CO-ORGANIZERS:

ISEKI - Food Association
Maize Research Institute
"Zemun Polje", Belgrade,
Faculty of Technology, Novi Sad,
Faculty of Technical Science, Novi Sad,
Institute of Field and Vegetable Crops, Novi Sad,
Institute for Food Technology, Novi Sad.

SUORGANIZATORI SKUPA:

ISEKI – Food association, Beč, Austrija,
Institut za kukuruz "Zemun Polje", Beograd
Tehnološki fakultet, Novi Sad,
Fakultet tehničkih nauka, Novi Sad,
Institut za ratarstvo i povrтарство, Novi Sad i
Institut za prehrambene tehnologije u Novom Sadu.

CONFERENCE HONORARY COMMITTEE:

- Prof. Dr. Milan Popović, Dean Faculty of Agriculture, Novi Sad, Serbia,
 - Dr. Žarko Obradović, Minister, Ministry of Education, Science and Technological Development, Serbia,
 - Prof. Dr. Dragoslav Petrović, Provincial Secretariat for Science and Technological Developmnet, Serbia,
 - Dr. Milosav Babić, Director, Maize Research Institute "Zemun Polje", Belgrade,
 - Prof. Dr. Zoltan Zavargo, Dean, Faculty of Technology, Novi Sad,
 - Prof. Dr. Rade Doroslovački, Dean Faculty of Technical Science, Novi Sad, Serbia,
 - Dr. Jovanka Lević, Director, Institute for Food Technology, Novi Sad, Serbia,
 - Danka Dujović, BSc, President of National Society Of Processing And Energy in Agriculture, "PKB Corporation", Belgrade and
 - Prof. Dr. Mirko Babić, General secretary of National Society Of Processing And Energy in Agriculture, Faculty of Agriculture, Novi Sad.
- Prof. dr Milan Popović, Dekan Poljoprivrednog fakulteta, Novi Sad, Dr Žarko Obradović, Ministar za prosvetu, nauku i tehnološki razvoj Republike Srbije, Prof. dr Dragoslav Petrović, Pokrajinski sekretar za nauku i tehnološki razvoj, APV, Dr Milosav Babić, Direktor Instituta za kukuruz "Zemun Polje", Beograd – Zemun, Prof. dr Zoltan Zavargo, Dekan Tehnološkog fakulteta, Novi Sad, Prof. dr Rade Doroslovački, Dekan fakulteta tehničkih nauka, Novi Sad, Dr Jovanka Lević, Direktor Instituta za prehrambene tehnologije, Novi Sad, Danka Dujović, dipl.ing, Predsednik Nacionalnog društva za procesnu tehniku i energetiku u poljoprivredi, „PKB Korporacija“ Beograd i Prof. dr Mirko Babić, Generalni sekretar Nacionalnog društva za procesnu tehniku i energetiku u poljoprivredi, Poljoprivredni fakultet, Novi Sad.

POČASNI ODBOR SKUPA:

SUPPORTERS:

Ministry of Education, Science and Technological Development
Ministry of Agriculture, Forestry and Water Management
Executive Council of the Autonomous Province of Vojvodina:
Secretariat for Science and Technological Development
Secretariat for Agriculture, Water Management and Forestry

POKROVITELJI SKUPA:

Ministarstvo za prosvetu, nauku i tehnološki razvoj, Republike Srbije,
Ministarstvo poljoprivrede, šumarstva i vodoprivrede Republike Srbije
Izvršno veće AP Vojvodine:
Sekretarijat za nauku i tehnološki razvoj,
Sekretarijat za poljoprivredu, vodoprivredu i šumarstvo

CONFERENCE ORGANIZING COMMITTEE:

Danka Dujović, BSc, President, "PKB Corporation" – Belgrade, Serbia,
Prof. Dr. Ljiljana Babić, Faculty of Agriculture, Novi Sad, Serbia,
Slavko Ivanišević, BSc, "Jedinstvo" – Apatin, Serbia,
Milivoj Radin, BSc, Institute of Field and Vegetable Crops, Novi Sad, Serbia,
Dr. Milka Vučaković, Poljoprivredna stanica, Novi Sad, Serbia,
Dr. Milovan Pavlov, Maize Research Institute "Zemun Polje", Belgrade, Serbia,
Prof. Dr. Vera Lazić, Faculty of Technology, Novi Sad, Serbia,
MSc. Slavica Sredanović, Institute for Food Technology, Serbia,
MSc. Velimir Lončarević, Institute of Field and Vegetable Crops, Novi Sad, Serbia,
Prof. Dr. Mirko Babić, General Secretary, Faculty of Agriculture, Novi Sad, Serbia,
Dr. Ivan Pavkov, Technical Secretary, Faculty of Agriculture, Novi Sad, Serbia
and MSc. Milivoj Radojičin, Technical Secretary, Faculty of Agriculture, Novi Sad, Serbia.

ORGANIZACIONI ODBOR SKUPA:

Danka Dujović, dipl.ing, Predsednik Nacionalnog društva za procesnu tehniku i energetiku u poljoprivredi, „PKB Korporacija“ Beograd,
Prof. dr Ljiljana Babić, Poljoprivredni fakultet, Novi Sad,
Slavko Ivanišević, dipl.ing, "Jedinstvo" – Apatin,
Milivoj Radin, dipl.ing, Institut za ratarstvo i povrtarstvo, Novi Sad,
Dr Milka Vučaković, Poljoprivredna stanica, Novi Sad,
Dr Milovan Pavlov, Institut za kukuruz "Zemun Polje", Beograd-Zemun,
Prof. dr Vera Lazić, Tehnološki fakultet, Novi Sad,
Mr Slavica Sredanović, Institut za prehrambene tehnologije, Novi Sad,
Mr Velimir Lončarević, Institut za ratarstvo i povrtar, Novi Sad,
Prof. dr Mirko Babić, gen. sekretar, Poljoprivredni fakultet, Novi Sad,
Dr Ivan Pavkov, tehn. sekretar, Poljoprivredni fakultet, Novi Sad
Milivoj Radojičin, dipl.mast. tehn. sekretar, Poljoprivredni fakultet, Novi Sad.

Increased concentrations of heavy metals in some agricultural areas, primarily as a result of human influence, threaten, among other things, the production of high-quality feed. *Medicago sativa* L. (alfalfa) is a perennial legume, which is regarded as the leading and most important forage crop for the production of quality feed and used in fresh and canned condition as hay, haylage, silage, meal, pellets and paste. The aim of this study was to determine the levels of mercury in soil and plants *Medicago sativa* L., to obtain information on safety of this nutrient. The examination was conducted in Hrtkovci, in the Republic of Serbia. Examined soil belongs to the automorphic soils, humus-accumulative class, type of chernozem, subtypes on loess and loess-like sediments and variety gleyic chernozem, with profile A_{mo}-AC-C. Soil has a good physical and chemical properties and is suitable for the production of alfalfa, if contamination with heavy metals would not be a limiting factor. The study involved eight localities. Sampling of soil and plant material was carried out in May 2011., in the second production year of alfalfa. Soil samples were taken in a disrupted state with agrochemical probe, at a depth of 0-30 cm. Mercury content was determined by cold vapor technique, using atomic absorption spectrophotometer. The mercury content in soil samples of examined localities was below the 0.001 mg/kg, which was not exceeded maximum level of 2.0 mg/kg, according to the Regulations on permitted amounts of hazardous and harmful substances in soil and water for irrigation and methods of their analysis (Službeni glasnik RS, no. 23/1994). The content of mercury in *Medicago sativa* L. was below 0.001 mg/kg, which is below the maximum permitted concentration, according to the Regulations on the quality of the feed (Službeni glasnik RS, no. 4/2010) is 0.1 mg/kg. On the basis of these results it can be concluded that the examined samples of alfalfa are suitable for feeding animals and do not threaten the food chain, as well as safe food production.

Key words: mercury, alfalfa, feed, gleyic chernozem

SADRŽAJ ŽIVE U UZORCIMA LUCERKE SA OGLEJENOG ČERNOZEMA

Povećane koncentracije teških matala na nekim poljoprivrednim površinama, prvenstveno usled antropogenog uticaja, ugrožavaju, između ostalog, i proizvodnju visokokvalitetne stočne hrane. *Medicago sativa* L. (lucerka) je višegodišnja leguminoza, koja se smatra vodećom i najvažnijom krmnom kulturom za proizvodnju kvalitetne stočne hrane, a koristi se u svežem i konzervisanom stanju kao seno, senaža, silaža, brašno, peleti i pasta. Cilj rada je bio da se utvrdi nivo žive u zemljištu i biljkama *Medicago sativa* L., radi dobijanja informacije o zdravstvenoj ispravnosti ovog hraniva. Ogled je izведен na području mesta Hrtkovci u R Srbiji. Ispitivanje zemljište pripada redu automorfnih, klasi humusno-akumulativnih, tipu černozem, podtipu na lesu i lesolikim sedimentima, te varijetu ogledeni černozem, s gradom profila Amo-AC-C. Zemljište se odlikuje povoljnim fizičko-hemijskim svojstvima i pogodno je za proizvodnju lucerke, ukoliko kontaminacija teškim metalima ne bi bila ograničavajući faktor. Ispitivanjem je obuhvaćeno osam lokaliteta. Uzorkovanje zemljišta i biljnog materijala je izvršeno tokom maja 2011. godine, u drugoj proizvodnoj godini lucerke. Uzorci zemljišta su uzeti u narušenom stanju, agrohemiskom sondom sa dubine 0-30 cm. Sadržaj žive je određen tehnikom hladnih para na atomskom apsorpcionom spektrofotometru. U svim uzorcima zemljišta ispitivanih lokaliteta sadržaj žive je bio ispod 0,001 mg/kg, čime nije prekoračena maksimalno dozvoljena količina od 2,0 mg/kg, prema Pravilniku o dozvoljenim količinama opasnih i štetnih materija u zemljištu i vodi za navodnjavanje i metodama njihovog ispitivanja (Službeni glasnik RS, br. 23/1994). Sadržaj žive u *Medicago sativa* L. bio je ispod 0,001 mg/kg, što je ispod maksimalno dozvoljene koncentracije, koja prema Pravilniku o kvalitetu hrane za životinje (Službeni glasnik RS, br. 4/2010) iznosi 0,1 mg/kg. Na osnovu rezultata istraživanja može se zaključiti da su ispitivani uzoreci lucerke pogodni za ishranu životinja te ne ugrožavaju lanac ishrane, kao ni proizvodnju zdrave hrane.

Ključne reči: živa, lucerka, stočna hrana, ogledeni černozem
